Career Aspiration

To pursue a dynamic and challenging career with an organization of repute, and integrating my own goals with the organization's, so as to become a catalyst in each other's growth.

Professional Profile

[REDACTED] (Dec 2017 - PRESENT)

- 4.5 Years of industry experience in the area of Software Testing (Manual and Automation) with a solid understanding of Test Planning, Test Design, Test Execution and Defect Reporting & Tracking.
- Expertise in Understanding and Analyzing Test Requirements, Tracking changes and maintenance of Test Requirements.
- Well acquainted with all phases of SDLC and STLC.
- Strong Experience in Automating Web Application Testing using Selenium WebDriver with TestNG framework.
- Well versed with Handling Elements in Selenium WebDriver.
- Executing Selenium Test Cases and Reporting defects.
- Experience in Data driven Testing, Cross browser testing and Parallel Test execution using Selenium WebDriver, TestNG and selenium Grid.
- Knowledge on LoadRunner Automation tool.
- Expertise in implementation of Automation framework using Selenium.
- Proficient in devising all the artifacts of testing such as Test Scenarios, Test Cases, Defect Reports and Test Summary Report.

Technical Skills

Automation Testing Tools	Selenium, WebDriver, LoadRunner
Build Tools	TestNG and Cucumber
Test Management Tools	Quality Centre, Jira
Programming Languages	SQL, C, Java
Database	SQL server

Selenium Skill Set

- Having 2.5 years hands on experience in **Selenium Testing and Protractor Testing using Selenium Webdriver.**
- Having 2 year hands on experience in **BDD (BEHAVIOR DRIVEN DEVELOPMENT) using cucumber.**
- Having 1 year hands on experience in **Page Object Model.**
- Having 2 years of experience in **Mobile Manual Testing.**

Project#1 Loan Management System

Client : Global Financial Services, UAE
Environment : JAVA, SQL, Servlets, Web logic
Testing Approach : Manual And Automation
Tools Used : Selenium
Role : Test Engineer

Description:

Loan Management System allows a retail finance organization to optimize their loan Management process by integrating Field Investigation, Mortgage, Processing, Recovery and Property management Systems in a Central Unit. Being web-based, it gives an organization truly any time, anywhere access.

This involves entry of all the details necessary for keeping a record of all inflows and outflows of loans. It has several modules like Administrator, New business, Disbursements, Clearing operations, General Ledger & Financial Accounts, Recoveries, Miscellaneous, Legal Issues, Back Office and Reports.

Responsibilities:

- Involved in 'Module Test Plan' Preparation and Requirements Streamlining.
- Preparing Requirement Traceability matrices for New business Module.
- Guiding the team members and handling the Risks.
- Involvement in Test Design includes Test Data preparation and Reviews.
- Involved in Automation Environment setup using Eclipse, Java, Selenium WebDriver jars and TestNG.
- Designed Test cases Using Selenium Webdriver and TestNG.
- Enhancing the Selenium Test cases for Cross browser testing.
- Involved in solving Environmental problems along with Technical Support People, especially in Sever Connections and Database sharing issues.
- Involved in Regression Testing using Selenium.
- Preparation of weekly and monthly status reports.

Project #2 cbs (Centralized Banking System)

Client	: Web based Banking Product, Sun Technologies, US
Environment	: Java, SQL
Testing Approach	: Manual and Automation
Tools Used	: Selenium Webdriver with TestNG framework
Role	: Test Engineer

Description:

CBS (Centralized Banking System) is a complete web based and centralized banking solution covering all the functions of a bank. It supports multi currency transactions and all types of delivery channels. The product has been developed using open, industry standard, proven technologies and high quality software engineering methodologies. CBS is highly parameterized to support constantly changing customer and regulatory requirements.

Responsibilities:

- Preparation of the Test Strategy and guiding the team.
- Involvement in the System Test Plan Preparation and Requirements Streamlining.
- Involvement in Preparation of Test Procedures, Test Scenarios, Cases and Test Data.
- Responsible for GUI and Functional Testing, using Black box Testing Techniques.
- Involvement in Test Execution, Results Analyzing and Defect Reporting.
- Involvement in RTM Preparation.
- Involved in Automation Infrastructure Development using Selenium.
- Created Test cases Using Element locators and Selenium Webdriver methods.
- Enhanced Test cases using Java programming features and TestNG Annotations.
- Execution of Selenium Test cases and Reporting defects.
- Conducting Data driven testing, cross browser testing and parallel test execution.
